

Golden Technologies Introduces New Four-wheel Buzzaround™ Scooter

OLD FORGE, PA, SEPTEMBER 23, 2004 – The popular three-wheel Buzzaround™ scooter by Golden Technologies is now available in a attractive four-wheel model. With a 300-pound weight capacity, the four-wheel Buzzaround offers added stability, a redesigned, more comfortable seat with more thigh support and a quick release battery system. Best of all, the four-wheel Buzzaround scooter features the highest quality components in its class, and is transported easily in cars or vans.

“The four-wheel Buzzaround is a natural extension of our three-wheel Buzzaround, the most popular, best selling scooter in its class,” says Richard Golden, CEO. “Unlike many of the scooters on the market this size, the Buzzaround scooter line is a true, high quality, work horse scooter that is completely portable at a very affordable price.”

In response to customers’ requests, all three and four-wheel Buzzaround scooters soon will come standard with a 15” deep seat with increased thigh support and a battery storage system that simply pulls off the base. Both models of the Buzzaround will still be completely portable and there will be no increase in cost due to the enhanced seat. The four-wheel Buzzaround is available in Vermillion Red and Arctic Blue.

Dealers can take a spin on the new four-wheel Buzzaround at Medtrade 2004. Golden Technologies will be located at booth 2701.

Golden Technologies is the world’s leading manufacturer of seat lift recliners and an emerging leader in the manufacture of scooters, power wheelchairs and adjustable beds.
