## **Golden Technologies Introduces All-new 2007 Buzzaround Lite Scooter**

**OLD FORGE, PA, July 3, 2006** – Golden Technologies is proud to introduce the newest scooter in its Buzzaround series, the all-new 2007 Buzzaround Lite scooter, model GB-106.

The GB-106 is the next generation of compact travel scooters under the Buzzaround brand. This new model has many features that differentiate it from other travel scooters including: easy three-step disassembly – simply pop off the seat, pull off the battery pack and push apart the frame; the most advanced wireless connector system for easy frame disassembly/assembly; and the most torque of any scooter in its class. The GB-106 can be delivered quickly to any Golden dealer through one of Golden's nationwide distribution centers. They are available to order now.

"We've had tremendous success with the Golden Buzzaround series, and it was time to take these compact travel scooters to the next level," says Rich Golden, CEO. "The GB-106 is an exciting scooter that offers end-users the portability they need in a comfortable, stable frame that disassembles quickly and easily with no wires to worry about."

The GB-106 has a weight capacity of 250 lbs. and a top speed of 4 mph. Each unit comes standard with three sets of quick-snap shroud panels in Vermillion Red, Arctic Blue, and Sahara and features cut pile auto-grade carpet on the floor. The new Buzzaround Lite features a larger, more comfortable seat and stylish, padded armrests not found on other scooters in this class.

Golden Technologies is the world's leading manufacturer of seat lift chairs and an emerging leader in the manufacture of scooters, power wheelchairs and adjustable beds. Golden's products are distributed throughout the United States, Canada, Australia, Europe and Japan.
