**Golden Technologies Moves Consumer Power to the Next Level with  
The Spectrum Seating Program**

**OLD FORGE, PA, February 23, 2006** – Golden Technologies is pleased to announce an innovative new approach to seating for its power chair lineup that is a first for the consumer power market. The Spectrum Seating Program from Golden Technologies offers consumers the widest selection of seating sizes and more standard seat sizes than any other manufacturer of consumer power mobility. The Spectrum Seating Program launches this month.

“This is a bold step for Golden Technologies; one no other manufacturer has taken. We now offer consumers three different seats in three different colors in a total of 45 sizes to get a truly custom fit on a consumer power base,” says Rich Golden, CEO. “Golden Technologies makes the highest quality, most comfortable and customizable lift chair on the market today; we should take that same approach with mobility seating.”

The seats in the Spectrum Seating Program for all Golden Compass™, Alante, Alante 201HD and Alante 2 power bases include the Captain's seat, the Deluxe high back seat, the Van/pan seat and Golden's ProFlex seat. The Captain's seat is available as a standard, no additional charge seat in the following sizes: 18"x18", 18"x20" and 20"x18;" additional sizes of the Captain's seat are available for a low introductory upcharge of \$99 and with minimal lead times. The standard size Captain's seat for the Alante 201HD and Alante 2 is 20"x20"; the 20"x18" Captain's seat is also available on those units at no additional charge. All sizes of the Deluxe High-back seat and the Van/pan seat, as well as the non-standard Captain's seat sizes, will be available for a low \$99 upcharge. The price of the ProFlex seat remains only \$250.

The Spectrum Seating program means that virtually anyone can fit into a Golden power chair comfortably. Golden has provided its dealers with an easy to use Seating Worksheet for Power Mobility for ordering the right seat for their customers. Through this program, Golden is providing dealers with these seating options at value-added, affordable prices to their dealers. The three standard seat styles in the three standard sizes will ship in one to two days, while most of the other seats in the program will ship in five days or less. These seats will be on display at Medtrade Spring, Booth 1041.

“There is a niche market out there of patients who need the highest quality consumer power base with seating options that aren't rehab options. What we're saying with the new Spectrum Seating Program is that you don't have to be rehab to have seating options,” says Golden.

Golden Technologies is the world's leading manufacturer of seat lift chairs and an emerging leader in the manufacture of scooters, power wheelchairs and adjustable beds. Golden's products are distributed throughout the United States, Canada, Australia, Europe and Japan.
