Golden Technologies Launches New Liteway™ Scooter

OLD FORGE, PA. September 28, 2006 – Golden Technologies is proud to introduce the newest scooter in its electric scooter lineup, the Golden Liteway™ scooter.

The Golden Liteway scooter features a fresh new design with its rugged, anti-rust steel tube frame, innovative under-seat cargo basket, a durable rubber floor mat and dual throttle controls with both thumb and finger levers.

The Golden Liteway scooter, which comes in Red and Blue, features a dual “jockey wheel” in the front of the scooter for added stability; has a 300 lb. weight capacity, and, thanks to its two 15-amp hour batteries, has a range of 7.5 miles at the maximum weight.

The Golden Liteway disassembles quickly and easily for transport: simply pull off the seat, pull out the rear battery pack, snap off the under-seat basket and pull apart the frame.

“This is a fresh new design not found in scooters with a 300 lb. weight capacity. It quickly captured the attention of everyone who came into the mobility side of our booth at Medtrade,” says Rich Golden, CEO.

The Golden Liteway scooter is available to order now. Contact Golden Technologies Customer Service department, 800-624-6374 or your Golden sales representative for more information.

Golden Technologies is the world’s leading manufacturer of seat lift chairs and an emerging leader in the manufacture of scooters, power wheelchairs and adjustable beds. Golden’s products are distributed throughout the United States, Canada, Australia, Europe and Japan.
