Safety Guidelines

The symbols below are used in the owner’s manual and/or on the product to identify warnings and notify you of important safety information. Make sure you read and understand them completely.

**WARNING!** Indicate(s) a hazardous situation which, if not avoided, could result in death or serious injury. This icon is represented as a black symbol on a yellow triangle with a black border.

**MANDATORY!** Failure to perform mandatory actions could cause personal injury and/or equipment damage. This icon is represented as a white symbol on a blue dot with a white border.

**PROHIBITED!** Indicate(s) an action(s) that should not be performed under any circumstance. Failure to adhere could cause personal injury and/or equipment damage. This icon is represented as a black symbol with a red circle and red slash.

**Safety Symbols**

The symbols below identify warnings, mandatory actions, and prohibited actions. They can be found in the owner’s manual and/or on the product. Make sure you understand all safety labels before operating the product. **Do not** remove safety labels from your product.

- Read and follow owner’s manual!
- Pinch/Crush Point Hazard!
- Transformer Crush Hazard!
- Fire Hazard!
- Child and/or Pet Crush Hazard!
- Adult, Child and/or Pet Tip Over Hazard!

Safety Guidelines

- Class II Device!
- Indoor use only!
- Do Not Smoke!
- Electrical hazard!
- Do not dispose in trash!
- Batteries required!
MANDATORY
READ THIS MANUAL FIRST BEFORE INSTALLING OR OPERATING YOUR POWER LIFT AND RECLINE CHAIR.

Your power lift and recline chair has been engineered from the leg levelers up to provide the ultimate in strength and reliability. Great care has been taken to provide you with total comfort and safety. Each unit is thoroughly inspected and tested prior to shipment.

⚠️ WARNING
Your power lift chair is a medical device. Therefore, you are required to exercise caution when operating it to ensure your personal safety and that of others around you. The following are rules for the safe operation of your power lift chair.

Care should be taken in the unpacking of this unit, so as not to cause injury to persons or damage to the unit. Dispose of all plastic bags and covers, as they can be a smothering hazard to small children.

Do not allow children or pets near the chair while the chair is operating.

Do not allow children to play with or operate the chair at any time.

Hand control should be unplugged and placed out of the reach of children when the chair is not in use.

Do not flop down into the chair when getting into it, or while it is in its lift position. Flopping down into the chair will damage it and could cause personal injury.

Do not allow anyone to sit on your lap, or on the arm of the chair, or on the footrest while in or operating the chair, as it may cause tipping and could result in personal injury.

Do not place fingers or hands between the seat cushion and the inside arm of the chair while sitting in the chair or when the chair is in operation or plugged into a power source.
Do not retrieve fallen objects from inside or under the chair while the chair is plugged into a power source.

Do not operate the chair if there are any persons, pets or other obstructions under or in front of the footrest, under the chair or behind the chair.

Do not position yourself, child and/or pet too high on the chair while the chair back is reclined. This can cause a tip over hazard. Make sure you are properly fitted for the lift chair prior to operating the chair.

Do not smoke while operating, sitting or resting in the chair.

To reduce risk of electrical shock, do not immerse any of the electrical components into a liquid, or spill any liquids onto electrical components. Do not open any of the electrical components. There are no serviceable parts.

Warranty will be void if any of the electrical components are opened by other than a qualified service person.

Make sure the chair is placed at the specified distance from a wall/corner (page 6). Failure to do so can damage the chair and will void the warranty.

Do not use any type of electrical extension cord to plug your chair into an electrical outlet. Make sure that all electrical products and their wires are positioned away from your chair as the metal lift frame mechanism could crush them and create a fire hazard and/or may cause personal injury.

Do not operate your lift chair while intoxicated or taking medications that impair your mental or physical abilities to operate the chair safely. Consult with your doctor about any medications you are taking that may affect the safe operation of the chair.

Do not operate this product if you have any medical conditions that result in limited, debilitating mental or physical capacity. You should consult your doctor before using this product.

Consult with your physician regarding using the Trendelenburg position.
INSTALLATION FOR YOUR POWER LIFT CHAIR

1. Remove the transformer from the transformer box (located behind the lower outside back). Place two 9 volt alkaline batteries into slots provided as shown. Place transformer on floor behind the chair.

2. Plug the transformer into a 115-120V 60Hz A.C. outlet and connect the power cable from the chair into the transformer as shown. Power cable is located under the chair attached to the motor with white zip tie. Remove zip tie, extend the cable under and out behind the chair.

3. Place the chair in the desired position in the room, keeping it 18" away from the wall. If placing the chair into a corner, keep it 18" from the wall as shown.

4. Adjust the leg levelers on the bottom of the chair if necessary to level the chair. Some high pile carpets can obstruct the footrest operation by rubbing against it. Adjust the levelers to a height above the pile.

5. Slide the hand control from between the back and arm out toward the back of the chair. Secure the cord into the quick release cable clamp located above the magazine pocket on the arm of the chair.

### Distance Required From Wall When Reclined

Power Lift Chair Operation

1. To recline your chair, press the down button (S2) and hold until you reach your desired position. Then release the button.

2. To return to a seated position from recline, press the up button (S1) and hold until the chair returns to a closed seated position. Then release the button.

3. To lift your chair, press the up button (S1) and hold until you reach your desired height. Then release the button.

4. To return to a seated position from lift, press the down button (S2) and hold until the chair returns to the floor seated position. Then release the button.

5. To lift your chair from a reclined position, press the up button (S1) and hold, the chair will keep going past the seated position and start to lift, release the button when the chair reaches the desired height.

6. To recline your chair from the lift position, press the down button (S2) and hold. The chair will keep going past the seated position and start to recline. Release the button when the chair reaches the desired reclined position.

7. Getting into your lift chair. While standing next to your chair, press the chair up button (S1) and raise the chair to a height you can sit against. This height will vary from person to person depending on the individual’s needs. Raise the chair high enough so you do not have to flop down into the chair. Flopping down into the chair can cause personal injury and damage to the chair. Press the chair down button (S2). As the chair continues downward, adjust yourself into a position that is comfortable to you. Continue pressing the button until chair is in the seated position (chair firmly on the floor), then release the button.

8. Getting out of your chair, press the chair up button (S1) and raise the chair to a height that enables you to easily stand. Release the button. Return the chair to the seated position (chair firmly on the floor) after getting out of the chair so children, pets or obstructions do not get under the chair.

Note: Your Golden power lift chair can be stopped at any time during lift or recline by releasing the selected button, offering you a wide range of comfortable positions. Select the position that best suits your needs. The motor is set to shut off when it reaches its fully extended or fully retracted position if the selected button is not released. If you should go past your desired position, select the button to bring you back to your desired position. You can repeat the process as often as you like.
Battery Back Up System

Your power lift chair comes with a battery back up system so the chair can return to the seated position in the event of a household power failure. The batteries have enough energy to bring the chair to a seated position from the recline position. **The batteries do not have enough energy nor are they intended to operate the chair for a prolonged period of time in the absence of standard household voltage (120 volt, 60 Hz).** **Batteries should be replaced after one use.** Batteries should be changed yearly. (See installation page 6.)

Smart Tek™ (Power Indication)

Your power lift chair is equipped with an indicator light on the hand control. This light illuminates green when any button on the hand control is pressed, indicating power to the hand control.

Your power lift chair also comes with a power indicator light on the transformer and on the power cord connecting the motor to the transformer. The lights illuminate green constantly, indicating power from the outlet to the transformer and the motor. The lights have been provided to help you identify electrical disconnects, should they occur, and to help your provider to diagnose electrical problems, should they occur.

Should the chair not operate and the lights are out, check all electrical connections to the chair. Make sure everything is plugged in properly and there is power to the outlet into which the chair is plugged (see installation on page 6 for electrical connections). **Should you ever encounter a problem with the operation of your power lift chair and the lights are on, such as mechanical problems or one light is out, discontinue all use of the product upon discovery of the problem.** Contact the provider from whom you purchased your chair. They will be able to resolve problems and take care of proper factory service if needed. You will need to be prepared to answer some basic questions about your power lift chair, such as model and serial number. The model and serial number are located on the back of the hand control and the rear of the lift frame. Your provider will ask you questions about your power indicator lights, such as which one is out. Prior to calling your provider, check all the electrical connections to the chair. Make sure everything is plugged in properly and there is power to the outlet into which the chair is plugged (see installation on page 6 for electrical connections).
CONSUMER LIMITED LIFETIME WARRANTY

AmeriGlide, through its authorized distributor/service organization, warrants this chair to original consumer only, against defects in material or workmanship as follows:

LIFETIME WARRANTY

AmeriGlide, warrants for the lifetime of the chair by the original consumer to repair or replace at their option the Lift Mechanism, Chair Frame and Recline Mechanism. Labor to replace these parts is subsidized for three years. AmeriGlide, shall not be responsible or obligated to pay for any cost or expense for examination of any warranted parts nor is AmeriGlide to pay for costs for transportation, handling and packaging of the parts or components.

THREE YEAR PARTS WARRANTY

AmeriGlide, warrants the electrical parts against defects to original consumer only, for a period of three years from the date of original purchase by a consumer. Labor to replace these parts is subsidized for one year. AmeriGlide, shall not be responsible or obligated to pay for any costs or expenses for examination of any warranted parts nor is AmeriGlide to pay cost for transportation, handling and packaging of the parts or components.

TERMS APPLICABLE TO WARRANTY

AmeriGlide will, at its option, repair and/or replace the defective parts and/or components provided that the warranty parts have not been subject to misuse, abuse or improper service by the consumer, have not been damaged in transit or handling and/or have not been altered or repaired by unauthorized representatives. This warranty does not include costs for unnecessary service calls, i.e., in-home service calls solely for the purpose of educating the consumer about the product, or finding an unsatisfactory power connection, etc. Exceeding the weight capacity of the chair will void the warranty. Fabric shading cannot be guaranteed for replacement parts or replacement chairs.

PR458-SMA .............................300 lbs.
PR458-MED .............................375 lbs.
PR458-LAR ...............................375 lbs.
PR458-S23 ...............................375 lbs.
PR458-M23 .............................375 lbs.

In the event that the product does not conform to this warranty at any time while this warranty is in effect, AmeriGlide will correct the defect in conformity with the Consumer Limited Lifetime Warranty. THE LIMITED LIFETIME WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESSED, IMPLIED, OR ARISING BY OPERATION OF LAW INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow this exclusion or limitation of incidental damages so the above limitation or exclusion may not apply to you.

AmeriGlide shall not be liable for any incidental or consequential damage or loss not contained in this Warranty.

This warranty gives you specific legal rights, and you may also have other rights, which may vary from state to state.

All warranty claims must be approved by AmeriGlide before any service is performed.

Warranty is valid in all 50 states, Canadian Provinces and Puerto Rico.
CARE AND MAINTENANCE

Your lift chair will require routine maintenance checks. You can perform some of these checks, while others may require assistance from a provider. By following these maintenance checks, you can make sure your lift chair gives you years of trouble-free operation. If you have any questions or concerns regarding your lift chair’s care and maintenance, contact your provider.

- Before cleaning your lift chair, consult your provider for the proper types of cleaner and cleaning methods.
- Keep all electrical components free from moisture and liquid spills. **Intended for indoor use only.**
- Periodically inspect all wiring harnesses to make sure they are not cut, damaged, frayed, or disconnected. If damage of any type is present, unplug the lift chair and contact your provider.
- Periodically check all fasteners for tightness, wear, and corrosion. If any of these are present, unplug the lift chair and contact your provider.

⚠️ **Warning:** Be careful of pinch points and sharp metal parts (wear gloves).

- Replace the batteries after one use. Replace the batteries yearly, even if they were not used. **Batteries are intended for one use only!**

---

⚠️ **CAUTION**

Do not allow children to play on this mechanized furniture or operate the mechanism.

Leg rest folds down on closing so that a child could possibly be injured.

Always leave chair in a sitting position. Keep hands and feet clear of mechanism. Only the occupant should operate it.
Please take a moment to fill out your warranty registration card. Your submission of this completed card assures your purchase is protected by the industry’s leading warranty. Be sure to make a copy of your registration. In the event a problem should occur, you will have all the necessary information needed to acquire service.
