Dear Valued Customer,

Thank you for purchasing this Golden Technologies Power Lift and Recline Chair. We are committed to providing our customers with the highest quality lift chairs Made by Americans. Our chairs are handcrafted and manufactured in Old Forge, PA. We are proud to produce the industry’s favorite lift chairs – for your family, and ours.

We believe that this product is made from the highest quality components available, is engineered to give you maximum service with minimum maintenance, and is backed by the strongest warranty in the industry. We hope that your Golden chair provides years of comfort and enjoyment, while assisting you in both sitting down and standing up.

Please take a few moments to review this manual to become familiar with the operation of this chair and our warranty. If you need additional information, please call the dealer from whom you purchased this chair.

Also, please note the following safety information: This power lift and recline chair is a medical device designed to help you sit down and stand up. Do not allow children to operate the chair at any time. When not in use, the chair should be kept in the sitting position.

Again, thank you for selecting this Golden chair.

Sincerely,

Richard Golden
Chief Executive Officer
Safety Guidelines

The symbols below are used in the owner’s manual and/or on the product to identify warnings and notify you of important safety information. Make sure you read and understand them completely.

**WARNING!** Indicate(s) a hazardous situation which, if not avoided, could result in death or serious injury. This icon is represented as a black symbol on a yellow triangle with a black border.

**MANDATORY!** Failure to perform mandatory actions could cause personal injury and/or equipment damage. This icon is represented as a white symbol on a blue dot with a white border.

**PROHIBITED!** Indicate(s) an action(s) that should not be performed under any circumstance. Failure to adhere could cause personal injury and/or equipment damage. This icon is represented as a black symbol with a red circle and red slash.

**Safety Symbols**

The symbols below identify warnings, mandatory actions, and prohibited actions. They can be found in the owner’s manual and/or on the product. Make sure you understand all safety labels before operating the product. Do not remove safety labels from your product.

Safety Guidelines

Class II Device!

Indoor use only!

Do Not Smoke!

Electrical hazard!

Do not dispose in trash!

Batteries required!
MANDATORY
READ THIS MANUAL FIRST BEFORE INSTALLING OR OPERATING YOUR POWER LIFT AND RECLINE CHAIR.

Your power lift and recline chair has been engineered from the leg levelers up to provide the ultimate in strength and reliability. Great care has been taken to provide you with total comfort and safety. Golden Technologies thoroughly inspects and tests each unit prior to shipment.

⚠️ WARNING

Your Golden power lift chair is a medical device. Therefore, you are required to exercise caution when operating it to ensure your personal safety and that of others around you. The following are rules for the safe operation of your Golden power lift chair.

Care should be taken in the unpacking of this unit, so as not to cause injury to persons or damage to the unit. Dispose of all plastic bags and covers, as they can be a smothering hazard to small children.

Do not allow children or pets near the chair while the chair is operating.

Do not allow children to play with or operate the chair at any time.

Hand control should be unplugged and placed out of the reach of children when the chair is not in use.

Do not flop down into the chair when getting into it, or while it is in its lift position. Flopping down into the chair will damage it and could cause personal injury.

Do not allow anyone to sit on your lap, or on the arm of the chair, or on the footrest while in or operating the chair, as it may cause tipping and could result in personal injury.

Do not place fingers or hands between the seat cushion and the inside arm of the chair while sitting in the chair or when the chair is in operation or plugged into a power source.

Do not retrieve fallen objects from inside or under the chair while the chair is plugged into a power source.
Do not operate the chair if there are any persons, pets or other obstructions under or in front of the footrest, under the chair or behind the chair.

Do not position yourself, child and/or pet too high on the chair while the chair back is reclined. This can cause a tip over hazard. Make sure you are properly fitted for the lift chair prior to operating the chair.

Do not smoke while operating, sitting or resting in the chair.

To reduce risk of electrical shock, do not immerse any of the electrical components into a liquid, or spill any liquids onto electrical components. Do not open any of the electrical components. There are no serviceable parts.

Warranty will be void if any of the electrical components are opened by other than a qualified service person.

Make sure the chair is placed at the specified distance from a wall/corner (page 7). Failure to do so can damage the chair and will void the warranty.

Do not use any type of electrical extension cord to plug your chair into an electrical outlet. Make sure that all electrical products and their wires are positioned away from your chair as the metal lift frame mechanism could crush them and create a fire hazard and/or may cause personal injury.

Do not operate your lift chair while intoxicated or taking medications that impair your mental or physical abilities to operate the chair safely. Consult with your doctor about any medications you are taking that may affect the safe operation of the chair.

Do not operate this product if you have any medical conditions that result in limited, debilitating mental or physical capacity. You should consult your doctor before using this product.

Consult with your physician regarding using the Trendelenburg position.
INSTRUCTIONS FOR THE PERFECT SLEEP CHAIR

1. Remove the transformer from the transformer box (located behind the lower outside back) and install two 9 volt alkaline batteries into the sockets on the transformer. Place transformer on the floor behind the chair.

2. Plug the transformer into a 115-120V 60Hz A.C. outlet and connect the power cable from the chair into the transformer as shown. Power cable is located under the chair attached to the motor shaft with white zip tie. Remove zip tie, extend cable under and out behind the chair.

3. Place the chair in the desired position in the room, keeping it 26" away from the wall. If placing the chair into a corner, keep it 26" from the wall as shown.

Distance required from the wall when reclined:
Wall: 26 inches - Corner: 26 inches

4. Adjust the leg levelers on the bottom of the chair if necessary to level the chair. Some high pile carpets can obstruct the footrest operation by rubbing against it. Raise the levelers to a height above the pile.

5. Slide the hand control from between the back and arm out toward the back of the chair. Secure the cord into the quick release cable clamp located above the magazine pocket on the arm of the chair.
**6-BUTTON HAND CONTROL OPERATION**

1. **To recline the back of the chair**, press button (S1) and hold until the back reaches the desired position. Then release the button.

2. **To bring the back of the chair to an upright position**, press button (S2) and hold until the back reaches the desired position. Then release the button.

3. **To raise the foot rest**, press button (S3) and hold until the foot rest reaches the desired position. Then release the button.

4. **To lower the foot rest and lift the chair**, press button (S4) and hold until the footrest closes, then release the button. If you want to lift the chair, continue holding button until chair reaches the desired height. Then release the button.

5. **To lower the chair from a raised position**, press button (S5) and hold until the chair reaches the floor. Then release the button. If you want to raise the footrest, continue holding the button until the footrest reaches the desired position. Then release the button. Button (S4) will also lower the chair from a raised position.

6. **To lift the chair from a seated position** (footrest closed), press button (S6). Continue holding button until chair reaches the desired height. Then release the button.

7. **To lift the chair with the back open** (back down, footrest closed), press button (S4). Continue holding the button until the chair reaches the desired height. Then release the button.

8. **To close and lift the chair from a reclined position** (footrest up, back down), press button (S6). If you want to bring the chair to a seated position, hold the button until the footrest closes, then release it. Press button (S2) to bring the back the rest of the way up to seated position. If you want to close and lift the chair, hold down the button until the chair stops. All 3 motors will automatically shut off when the back closes all the way and the chair reaches its highest position.

9. **Getting into your lift chair.** While standing next to your chair, press button (S4 or S6) and raise the chair to a height you can sit against. This height will vary from person to person.
PERFECT SLEEP CHAIR POSITIONS

Your Perfect Sleep Chair has been equipped with the MaxiComfort™ System. The MaxiComfort System has been designed specifically for you. Offering you a wide range of body positioning, so you can choose the position that best suits your needs. The MaxiComfort System accomplishes this by providing four primary motions: three recline, one lift and combinations of those motions, allowing you to settle into your favorite comfort position. Shown below are some of the MaxiComfort positions. There are many to choose from. You may stop your Perfect Sleep Chair at one of the positions shown or anywhere in between just by releasing the buttons on the hand control when the chair reaches the position you desire.

Note: The motors are set to shut off when they reach their fully extended or fully retracted position if the selected button is not released. If you should go past your desired position, select the button to bring you back to your desired position. You can repeat the process as often as you like.
Battery Back Up System

Your Perfect Sleep power lift chair comes with a battery back up system so the chair can return to the seated position in the event of a household power failure. A fresh set of standard 9V batteries have enough energy to bring the chair to a seated position from the recline position. The batteries do not have enough energy nor are they intended to operate the chair for a prolonged period of time in the absence of standard household voltage (120 volt, 60 Hz). Batteries should be replaced after a single use. Batteries should be changed semi-annually (such as with smoke alarm batteries). For your convenience, an initial set of batteries is provided for your use. It is the user’s responsibility to ensure that fresh batteries are used in the battery back up system. To help ensure the longest life of the batteries, users are encouraged to not allow the remotes to become wedged in between the seat cushions and the chair as this may activate the backlights on the remote and create a slow drain of the batteries. (See installation page 7.)

Smart Tek™ (Power Indication)

Your power lift chair is equipped with an indicator light on the hand control. This light illuminates green when any button on the hand control is pressed indicating power to the hand control.

Your power lift chair also comes with a power indicator light on the transformer and on the power cord connecting the motor to the transformer. The lights illuminate green constantly, indicating power from the outlet to the transformer and the motor. The lights have been provided to help you identify electrical disconnects, should they occur, and to help your provider to diagnose electrical problems, should they occur.

Should the chair not operate and the lights are out, check all electrical connections to the chair. Make sure everything is plugged in properly and there is power to the outlet into which the chair is plugged (see installation on page 7 for electrical connections). Should you ever encounter a problem with the operation of your power lift chair and the lights are on, such as mechanical problems or one light is out, discontinue all use of the product upon discovery of the problem. Contact the provider from whom you purchased your chair. They will be able to resolve problems and take care of proper factory service if needed. You will need to be prepared to answer some basic questions about your power lift chair, such as model and serial number. The model and serial number are located on the back of the hand control and the rear of the lift frame. Your provider will ask you questions about your power indicator lights, such as which one is out. Prior to calling your provider, check all the electrical connections to the chair. Make sure everything is plugged in properly and there is power to the outlet into which the chair is plugged (see installation on page 7 for electrical connections).
CONSUMER LIMITED LIFETIME AND SEVEN YEAR WARRANTY
PERFECT SLEEP CHAIR MODELS

GOLDEN, through its authorized distributor/service organization, warrants this chair to original consumer
only, against defects in material or workmanship as follows:

LIFETIME WARRANTY
GOLDEN, warrants for the lifetime of the chair by the original consumer to repair or replace at their option
the Lift Mechanism, Chair Frame and Recline Mechanism. Labor to replace these parts is subsidized on
all models for three years.
GOLDEN, shall not be responsible or obligated to pay for any cost or expense for examination of any
warranted parts nor is Golden to pay for costs for transportation, handling and packaging of the parts or
components.

THREE YEAR PARTS WARRANTY
GOLDEN, warrants the electrical parts of this chair against defects to original consumer only, for a period
of three years from the date of original purchase by a consumer. Labor to replace these parts is subsidized
for one year on all models.
GOLDEN, shall not be responsible or obligated to pay for any costs or expenses for examination of any
warranted parts nor is Golden to pay cost for transportation, handling and packaging of the parts or
components.

LIMITED WARRANTY FOURTH THROUGH SEVENTH YEAR
During the period beginning with the expiration of the full three year parts warranty offered above and
continuing through the seventh year after date of original purchase by a consumer, GOLDEN will warrant
the electrical parts on the following pro-rated basis. Year 4 earns a 35% discount off suggested retail price.
Year 5 earns a 25% discount, year 6 a 15% discount and year 7 a 5% discount. By way of example, a part
costing $100.00 that needs replacement in year 4 would cost $65.00.
GOLDEN shall not be responsible or obligated to pay for any costs or expense for examination and/or
service of any warranted part or to pay for costs of transportation, handling and packaging of the chair
and/or parts or components.

TERMS APPLICABLE TO WARRANTY
GOLDEN will, at its option, repair and/or replace the defective parts and/or components provided that the
warranty parts have not been subject to misuse, abuse or improper service by the consumer, have not been
damaged in transit or handling and/or have not been altered or repaired by unauthorized representatives.
This warranty does not include costs for unnecessary service calls, i.e., in-home service calls solely for the
purpose of educating the consumer about the product, or finding an unsatisfactory power connection, etc.
Exceeding the weight capacity of the chair will void the warranty. Fabric shading cannot be guaranteed for
replacement parts or replacement chairs.

The Perfect Sleep Chair weight capacity is 375 lbs.

WARRANTY EXCLUSION
GOLDEN, does not provide warranty for the batteries. Batteries are a consumable item that can drain,
even without use, over time.

In the event that the product does not conform to this warranty at any time while this warranty
is in effect, Golden will correct the defect in conformity with the Consumer Limited Lifetime and
Seven Year Warranty. THE LIMITED LIFETIME AND SEVEN YEAR WARRANTY SET FORTH ABOVE IS THE
SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEN OF AND EXCLUDES
ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESSED, IMPLIED, OR
ARISING BY OPERATION OF LAW INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF
MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR
PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES.
Some states do not allow this exclusion or limitation of incidental damages so the above limitation
or exclusion may not apply to you.

GOLDEN shall not be liable for any incidental or consequential damage or loss not contained in this
Warranty.

This warranty gives you specific legal rights, and you may also have other rights, which may vary from
state to state.

All warranty claims must be approved by Golden Technologies before any service is performed.

Warranty is valid in all 50 states, Canadian Provinces and Puerto Rico.
CARE AND MAINTENANCE

Your lift chair will require routine maintenance checks. You can perform some of these checks, while others may require assistance from a provider. By following these maintenance checks, you can make sure your lift chair gives you years of trouble-free operation. If you have any questions or concerns regarding your lift chair’s care and maintenance, contact your provider.

✓ Before cleaning your lift chair, consult your provider for the proper types of cleaner and cleaning methods.

✓ Keep all electrical components free from moisture and liquid spills. **Intended for indoor use only.**

✓ Periodically inspect all wiring harnesses to make sure they are not cut, damaged, frayed, or disconnected. If damage of any type is present, unplug the lift chair and contact your provider.

✓ Periodically check all fasteners for tightness, wear, and corrosion. If any of these are present, unplug the lift chair and contact your provider.

⚠️ **Warning:** Be careful of pinch points and sharp metal parts (wear gloves).

✓ Replace the batteries after one use. Replace the batteries yearly, even if they were not used. **Batteries are intended for one use only!**
